

Sydney Academy
Teacher Communication Plan
2009-2010

Teacher: Sandy Urquhart

Course: Math 12 IB

Course Overview:

This academic course is a 1 credit math course designed to provide students the opportunity to gain a deeper understanding of math and to acquire the skills required to succeed in university math courses and for the IB exam. The course will cover material on Trigonometry and Calculus.

Students absent from class, for any reason, are **still held responsible** for the work missed during that time. Regular, on time attendance, is not only encouraged but also beneficial to student's learning. Our school has an automated dialer program which sends a phone message that a student has missed class. The first week in each month, students will take home a record of their previous month's attendance.

Course Evaluation:

Tests and In Class Assignments 40%

Portfolios 10%

January Exam 20%

Final Exam 30%

Student Assessment:

The mid-term report card for this semester will be sent home in November. It is based on all tests and assignments to that date.

Parents/ Guardians wishing further information regarding their child's progress may contact me personally through the school at 562-5464 or at surquhart@staff.ednet.ns.ca.

Thank you.
