Business Technology 11
Mrs. Ava Davidson

In Business Technology 11 students develop a basic proficiency in touch keyboarding. These keyboarding skills will be integrated and developed through the use of business production software (word processor, spreadsheet, and desktop publishing). Students will integrate touch keyboarding skills with skills in document production and design. This includes creating spreadsheets to manage data, applying principles and practices of desktop publishing to design and create documents, and becoming confident and purposeful users of business productivity software. This course meets the technology compulsory credit requirement for graduation.

Students will complete 5 Modules: Module 1--Touch Keyboarding (Integrated); Module 2--Document Processing; Module 3--Spreadsheets; Module 4--Desktop Publishing; and Module 5--Business Technology Fundamentals (Integrated)

If you are absent on a scheduled due date, it is still your responsibility to submit the assignment on time. Students who miss class time are responsible for keeping their work up to date and will be permitted to use classroom equipment at lunch or after school. Students will receive a mark of “0” if they submit work other than their own.
