

COMMUNICATION TO PARENTS

OVERVIEW OF THE COURSE

OCEANS 11

This is a one semester course that will offer students the opportunity to explore aspects of global and local oceanography and current ocean related issues. Compulsory learning modules include: structure and motion, marine biome, coastal zones, and an additional unit on fisheries and aquaculture.

B. GENERAL COMMENTS

Each student has the potential to contribute substantially to the class atmosphere. This contribution can be positive only if attendance is consistent. When a student misses time, the notes alone will not review the entire class. It is impossible to recapture the discussion, questions, and explanations that are merely highlighted in the notes. Therefore, regular attendance is essential.

Extracurricular activities are extra; therefore, absences for such activities should not interfere with assignments, test preparation, etc. Students should review their schedule and assignments should be passed in before leaving for tournaments.

C. ASSESSMENT

Student progress will be closely monitored. Marks will be awarded for daily class participation, daily written work, and homework assignments. Assessment of student learning will also be based on tests, assignments and formal examinations.

WRITING ASSIGNMENTS

- Use white unlined paper
- Double space writing or typing
- Handwritten assignments must be legible
- If a computer is used, please understand that excuses dealing with faulty printers, deleted work, etc. will not be accepted. The student is given plenty of notice of due dates. If there are computer problems, the assignment should be handwritten and turned in on time.

DUE DATES

- All assignments must be passed in on time. There will be few, if any extensions.
- Each day an assignment is late, 20% will be deducted from the final grade of the assignment.
- If the student is absent on the scheduled due date, have a friend or relative deliver the assignment or have the parent/guardian contact the teacher at the school.
