

**Sydney Academy**  
**Teacher Communication Plan**

**Teacher: Sandy Urquhart**

**Course: Math 11Foundations**

**Course Overview:**

This course is a 1 credit math course designed to provide students the opportunity to gain a deeper understanding of math. The course will cover material in Linear Relations, Consumer Math, Statistics, and Applications of Trigonometry.

Students will be expected to bring their notebook and a pencil to class every day. A straight edge and calculator will also be required for this course.

Students absent from class, for any reason, are **still held responsible** for the work missed during that time. Regular, on time attendance, is necessary for success in this course. Our school has a new attendance policy this year, and students missing 16 classes in any course cannot receive credit for that course. Please read our school communication plan for details.

**Course Evaluation:**

<b>Tests and Assignments</b>	<b>50%</b>
<b>Comprehensive Test</b>	<b>20%</b>
<b>Final exam (all material)</b>	<b>30%</b>

**Student Assessment:**

The mid-semester report card will be sent home by Nov. 23. It is based on all tests and assignments to that date. The parent teacher sessions for this semester will be Nov 24, 25. Parents/ Guardians wishing further information regarding their child's progress may contact me personally through the school at 562-5464 or [surquhart@staff.ednet.ns.ca](mailto:surquhart@staff.ednet.ns.ca)  
Thank you.
