

Sydney Academy
Teacher Communication Plan
2011 – 2012

Teacher: Mr. Nicholson

Design 11

Course Overview

Design 11 is a course designed to allow students to use different types of technology to communicate ideas that show the principals and elements of design. This course is set up to allow students to gain basic media skills that may be used in either Multimedia 12 or Digital Art 12. Curriculum outcomes are achieved through the study of technology, graphics as well as several programs that allow students to demonstrate principals and elements of design. This is a project-based course; when finished projects make up the majority of the student mark. In order to be successful at this course you **MUST** attend and work in class. Students are responsible for missed time and must get caught up on missed work.

Student Learning Assessment Methods:

- Informal evaluation / observations
- Projects
- Technology use
- * Independent Study (approved by instructor)

Evaluation Procedures

- Projects Assignments = 60%
- Daily Work = 40 %

Teacher Expectations of Student:

- Attend class regularly
- Projects completed and passed in on time
- Responsible for work completed during absence

Teacher Formal / Informal Communication Methods:

- Individual one on one discussion

Methods for Parental Communication with Teacher:

- Parent Teacher Meeting
- Calls to and from home
